Halifax, NS | Phone: 786-883-5208
HUDSONLATIMER4@gmail.com | [Github](#) | [Portfolio](#)

Junior Web Developer seeking an entry-level web or full-stack development role. Experienced in building full-stack web applications using modern JavaScript frameworks, serverless backends, and relational databases, with a focus on practical, business-driven solutions and clean, maintainable code.

TECHNICAL SKILLS

Frontend: Next.js (App Router), React, TypeScript, JavaScript (ES6+), HTML, CSS, Tailwind CSS

Backend: Node.js, Supabase (PostgreSQL, Auth), REST APIs, Serverless Functions

Databases: PostgreSQL, Supabase

Tools & Platforms: Git, GitHub, Vercel, Netlify, Postman, VS Code

Concepts: Responsive Design, Authentication & Authorization, CRUD Application Design

PROJECTS

Local Business CMS | Next.js 14, Supabase, Tailwind, Vercel

- Built complete CMS for local businesses allowing owners to manage website content
- Implemented role-based authentication (owner/admin/editor) with Supabase Auth
- Created draft/publish workflow with version history and scheduled publishing

Job Board Platform | Next.js, TypeScript, Supabase, Stripe

- Developed a job board application allowing employers to create, edit, and manage job postings
- Implemented relational data models for jobs, companies, and applications
- Built job search and filtering functionality for public users

Task & Project Management Application | Next.js, TypeScript, Tailwind, Supabase

- Created a task and project management system with user authentication and user-scoped data
- Implemented full CRUD for projects and tasks with status tracking and due dates
- Ensured clean state management and data validation

E-Commerce Store with Admin Dashboard | Next.js, TypeScript, Tailwind, Supabase

- Built a full-stack e-commerce application with product listings, cart functionality, and order creation
 - Implemented admin-only product and category management
 - Designed end-to-end application flow using serverless APIs
-

WORK EXPERIENCE

Founder & Web Developer - HuddySites

2026 - Present

- Design and develop websites for small businesses using modern web technologies
- Build and deploy full-stack web applications with responsive layouts and content management functionality
- Work directly with non-technical clients to gather requirements and deliver business-focused solutions

Web Developer / Social Media Manager - Rent Roam (Part-Time)

2022-2025

- Designed, developed, and maintained a customer-facing website
- Tested site functionality across key user flows
- Identified and resolved usability and functional issues
- Managed payment workflows and validated transaction accuracy

EDUCATION

Nova Scotia Community College

College diploma, IT Programming – 2026 Spring Graduate
Honours with Distinction in courses to date – 95 % Average

CERTIFICATIONS

- Excel Essential Training Microsoft 365
- Introduction to the Nova Scotia Occupational Health and Safety Act
- Introduction to WHMIS (Workplace Hazardous Materials Information Systems)
- React Essential Training
- Technical Support Fundamentals (Google)
